We bring in local business & industry to our building for many events, however we never slow down to network between those business professionals and our educators in the classrooms. At this event our goal is to **CONNECT & ENGAGE** those two groups of people in hopes of strengthening Career & Technical Education for all. We know this will not happen overnight, but the first step is building relationships between stakeholders who want to make a difference for today's students to fulfill tomorrow's job needs.

Career Cluster Focus Areas

90 minute breakouts by career clusters shown below
